

Lehmann&Voss - Complex-Ester

| Product | Chem. Description | Features and Benefits |
|-------------------------|----------------------------------|---|
| LUVODUR® ES 4860 | Trimethylolpropane Complex Ester | Good thermal and oxidation stability. For high temperature chain oils. Improves rheology properties. Very low evaporation tendencies (Noack). Vk40: 100 mm ² /s. |
| LUVODUR® ES 4861 | Trimethylolpropane Complex Ester | Good thermal and oxidation stability. Improves rheology properties. Soluble in mineral oils. Good lubricity. Vk40: 50 mm ² /s. |
| LUVODUR® ES 4862 | Complex Ester | Good thermal, oxidative and hydrolytic stability. Rheology modifier in MWF concentrates and neat oils. Soluble in mineral oils. Good lubricifier. Vk40: 440 mm ² /s. |
| LUVODUR® ES 4863 | Complex Ester | Saturated viscosity modifier for all applications, thermo-oxidative stability. Very high viscosity index >300. Vk100: 1200 mm ² /s. |
