MICROSPONGE® N Delivery System	Cellulose	Amcol HBS	The proven technology of the original Microsponge® delivery system is now available with natural microparticles. This All-Natural delivery system is the scientific answer to deliver on these consumer expectations. Active ingredients are isolated deep within the core of the Microsponge® N matrix. Through a combination of friction and diffusion, the actives are steadily released from the matrix.
MICROSPONGE® Delivery System		Amcol HBS	Microsponge® technology is a multi-functional delivery system designed to improve the stability and reduce the irritation of cosmetic and pharmaceutical actives in topical formulations. Microsponge is a recognized brand in the pharmaceutical industry that is now available for cosmetic applications. Microsponge products are free-flowing powders that can be readily dispersed in gels, emulsions, and powders.
Poly-Pore® Delivery System		Amcol HBS	Poly-Pore Technology entraps actives and enhances the performance of ingredients through their unique and patented chemical structure. This leading technology is used to provide various therapies for many skin problems, including: anti-aging, cellulite and acne treatment.
Polytrap® Delivery System		Amcol HBS	Polytrap Technology entraps liquid actives and converts them to powders. During application Polytrap releases actives and adsorbs excess skin oils.

PHYLCARE® HYACOLOR / 3D	Sodium Hyaluronate, Ricinus Communis(Castor) Seed Oil, Hydrogenated Castor Oil	LEHVOSS Personal Care	By combining the Natural Moisturizing Factor-Sodium Hyaluronate(HA) with Color Cosmetics, this new and unique product provides a look of natural beauty. Hyacolor is an effective solution to apply Natural Moisture Factor HA in the decorative cosmetics and can be used as a good humectant in makeup products.
PHYLCARE® MINI HA	Hydrolyzed Sodium Hyaluronate	LEHVOSS Personal Care	The new enzymatic degradation method takes the place of chemical degradation to produce oligo sodium hyaluronate for the first time in the world. The advantages are high purity, no structural change, moderate reaction conditions, neutral pH, environmental friendly. MiniHA thanks to its unique features, offers you the perfect pro-aging choice. With a deep hydration, and improving firmness and elasticity properties, miniHA helps to reduce the appearance of lines and wrinkles and leaves the skin smoother and younger looking.
PHYLCARE® OL-HA	Hyaluronic Acid	LEHVOSS Personal Care	Based on its anionic nature and the structure of the repeating disaccharide in the monomer; PHYLCARE® OL-HA can penetrate through the stratum corneum rapidly, raising hyaluronic acid content in the skin. Cosmetic anti-ageing products can be created with comprehensive moisturising properties. Low molecular weight: < 10,000 Dalton.
PHYLCARE® NAYAL	Sodium Hyaluronate	LEHVOSS Personal Care	Sodium Hyaluronate available in different molecular weights for medical device applications.
PHYLCARE® SODIUM HYALURONATE 0.5 % XS + 0.5 % HW	Sodium Hyaluronate, Aqua	LEHVOSS Personal Care	Exceptional moisturizing properties.

Commercial Name	INCI	Producer	Description
PHYLCARE® SODIUM HYALURONATE 1 % HW	Sodium Hyaluronate, Aqua	LEHVOSS Personal Care	Film forming and high performance.
PHYLCARE® SODIUM HYALURONATE 1 % MW	Sodium Hyaluronate, Aqua	LEHVOSS Personal Care	Excellent efficiency for long lasting hydration.
PHYLCARE® SODIUM HYALURONATE 2% EXTRA LW	Sodium Hyaluronate, Aqua	LEHVOSS Personal Care	Purest grade, biotechnological origin. Very low molecular weight (100 to 400 kDa). Deep hydration.
PHYLCARE® SODIUM HYALURONATE EXTRA LW	Sodium Hyaluronate	LEHVOSS Personal Care	Purest grade, biotechnological origin. Very low molecular weight (100 to 400 kDa). Deep hydration.
PHYLCARE® SODIUM HYALURONATE HW	Sodium Hyaluronate	LEHVOSS Personal Care	Purest grade of biotechnological origin. High molecular weight (1800 to 2200 kDa). Film-forming, tensing properties.
PHYLCARE® SODIUM HYALURONATE LW	Sodium Hyaluronate	LEHVOSS Personal Care	Purest grade, biotechnological origin. Low molecular weight (400 to 1000 kDa). Fast track hydration.
PHYLCARE® SODIUM HYALURONATE MW	Sodium Hyaluronate	LEHVOSS Personal Care	Purest grade, biotechnological origin. Medium molecular weight (1000 to 1800 kDa). Excellent efficiency for long lasting hydration.
PHYLCARE® SODIUM HYALURONATE XS	Sodium Hyaluronate	LEHVOSS Personal Care	Purest grade, biotechnological origin. Lowest molecular weight (less than 100 kDa). Exceptional technical moisturizing properties.
